Welcome, *username* | [Log-Out](#)

>: type in your command or type "help" and press "Enter"

My notes:

1. Call "Sevco" to correct my order for the long weekend.

That "OliveU" stuff just drives me crazy...Ummm, can not stand it anymore!!!

3. Ask Alex if he can cover Ellen's shift on Wed.

4. Don't forget schedule Jenn for Tuesday afternoon!!! (Solved)

...

This is the initial screen of the "timeApplicator" when it's loaded.

This is the command line (console) where you type in your commands and execute them. The console is the main working area of the "timeApplicator".

Notes are saved automatically while typed in.

If you want to mark a note/task as solved, type "Solved" in round brackets next to it - (Solved). The whole note becomes green then.

If you want to delete a note, simply delete/erase it from the board. Changes are saved automatically.

>: chat {Ellen Kern, Edward DeBari}

...

Edward DeBari has joined

...

Ellen Kern has joined

Hey guys, how are you?

Ellen, can you cover Edward's shift tomorrow?

On Friday, he'll cover your shift and you can take your requested day off!

Ellen Kern: ummm, I'm not sure, I have plans for tomorrow =(

Edward DeBari: Ellen, come on, you can have your plans transfered to Friday, while I can not transfer my flu anywhere!

Ellen Kern: okkkkkkkkk Edward. you own then!

Edward DeBari: thanks Ellen!

Thank you Ellen. Your are great! Edward, get well soon and drink more tea!

dropchat

The chat communication is terminated.

1

The timeApplicator automatically sends notification sms to the specified employees.

When the notified employees join the chat, the notification message is displayed.

2

If you type in the "dropchat" command, the currently running chat will be terminated. The timeApplicator will send all chat participants notification messages.
